Did you know.....?

- ❖ Carrots were originally purple and changed color in the 17th century when Dutch farmers extracted mutant strains, to develop them into the orange ones we eat today!
- ❖ Astronaut John Young smuggled a corned beef sandwich onto his spacecraft for a six-hour mission. The sandwich didn't do too well in zero-gravity conditions and Young quickly put it back in his pocket after getting it out. This could've had grave consequences. Floating crumbs and debris could've caused damage to the shuttle but luckily, they returned to Earth and NASA took bold steps to make sure that sandwiches never boldly go where no one has gone before.
- ❖ Herring fish communicate by using flatulence.
- ❖ The word "kimono", literally means a "thing to wear". Ki is "wear", and mono is "thing".
- ❖ By the time they have been retired for 2 years, 78% of former NFL players have gone bankrupt or are under financial stress because of joblessness or divorce.
