# TRY SOMETHING NEW!

**10061469 JURGIELEWICZ DUCK GIZZARDS 1/10 # AVG RO**

The gizzard is one of the most nutritious parts of poultry. It is high in protein. So high, in fact, that one cup of gizzard meat can satisfy up to 88% of your daily recommended value of protein. It is also low in fat and high in vitamins. When cooked correctly, gizzards are transformed into some very tender and delicious meals.

**Handling:** Gizzards should be cut in half and soaked in water to rid any impurities. Toss with coarse Kosher salt and let sit for about an hour or overnight. Rinse a few more times. The outer silver skin should come right off, although some leave it on.

**Cooking:** They must then be slowly braised or comfited for tenderness. You can also corn them.

**Uses:** Salads, skewers, stir fry dishes, tacos, Bolognese, Pho's (Vietnamese/Asian soups), stuffing, etc.

Delicious, shelf stable, 100% juices. Each 4 oz box equals ½ cup fruit serving.

**R-RIVIERA BEACH; O-OCALA; P-PUNTA GORDA; S-STATESVILLE**

## Did you know.....?

- ❖ Famous inventors left their mark on the American barbecue: The first commercial charcoal briquet factory was designed by Thomas Edison and built by Henry Ford in 1921.
- ❖ The only capital letter in the Roman alphabet with exactly one end point is P.
- ❖ In 1963, major league baseball pitcher Gaylord Perry remarked, "They'll put a man on the moon before I hit a home run." On July 20, 1969, an hour after Neil Armstrong set foot on the surface of the moon, Perry hit is first, and only, home run while playing for the San Francisco Giants.
- ❖ The main library at Indiana University sinks over an inch a year. When it was designed engineers failed to consider the weight of all the books that would occupy the building.
- ❖ You are more likely to be infected by flesh-eating bacteria than you are to be struck by lightning.

"I finally found a diet I can live with. Anything dipped in green food coloring counts as a salad!"
